

Reason:

Powell and Donovan are assigned to a space station which supplies energy via microwave beams to the planets. The robots, that control that energy beams, are coordinated by QT – 1, known as Cutie. Cutie deudes that space, stars and the planets beyond the station don't really exist, and that the humans that visit the station are unimportant. QT – 1 makes the lesser robots _____ of a new religion and robots disregard human commands as inferior. They refuse to follow human orders. Although the robots were unaware, they had been following the First and Second Laws all along. Powell and Donovan realize that there is no need to do anything for the rest of their four of duty. Cutie's religion cannot be eliminated, but since the robot performs its job as well, it is moot.

ESP Now and ESP Mesh protocols:

ESP Now is a protocol that allows you to control the smart lights in your home without the use of Wi – Fi router. ESP Mesh is a protocol that can be used to cover Wi – Fi blind spots in home enviroments where Wi – Fi signal cannot be reached. In short, main difference between two protocols is that ESP Now doesn't, but ESP Mesh does need Wi – Fi router.
